Summary

Computer Engineering graduate passionate about building maintainable, scalable, and secure full-stack software and web applications. Skilled in designing system architectures with attention to detail to create intuitive, user-friendly interfaces, and eager to innovate and contribute to impactful projects.

Education

B.Sc. Computer Engineering, Semnan University, Iran 2021–2025
Thesis: Full-Stack AI E-Commerce with LLM-based Product Recommendation (Grade: 19.5/20)
Final Year GPA: 3.8/4.0 (17.85/20)

Skills

Programming Languages: Python, JavaScript (ES6+), C++
Frontend Development: HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, Bootstrap, Material UI (MUI), responsive web design
Backend Development: Python (Django), Node.js, Express.js, API design, RESTful APIs
Software Development Principles: Design patterns (e.g., Factory, Singleton), SOLID principles, separation of concerns, clean code practices
Agile and Collaboration: Scrum methodology, Agile practices (sprints, stand-ups, task breakdown)
Databases: SQL, MySQL, PostgreSQL, SQLite, MongoDB, Redis
DevOps: Git, GitHub, GitLab, Docker
Tools: VS Code, Cursor AI, Jira
Automation and AI Tools: Prompt engineering, n8n
Networking and Systems: Wireshark, Bash scripting
Documentation and Productivity: LaTeX, Microsoft Word, PowerPoint, Excel

Work Experience

Bachelor's Project – Full-Stack E-Commerce Platform (Self-Employed) 2024–2025

- Built a high-traffic full-stack e-commerce platform using React.js, Tailwind CSS, Express.js, and PostgreSQL.
- Designed the system end-to-end, from UI/UX to backend architecture, applying software design patterns and best practices.
- Integrated a local LLM for personalized, up-to-date product recommendations based on full database analysis.
- Achieved a 19.5/20 grade, recognized as one of the top projects in the department.
- Code available for demonstration upon request (not public due to university policy).

Software & Web Developer, PoonehPanir Company, Tehran, Iran Ma–Sep 2025

- Led the migration of the company website from WordPress to a custom-coded solution using React.js and Tailwind CSS.
- Gained hands-on experience in DevOps practices and collaborative development workflows.

Freelance Web Developer 2024–2025

- Maintained and debugged web applications using HTML, CSS, and JavaScript.
- Tracked tasks and coordination through Jira to ensure quality and timely delivery.

Projects

Fitness AI Coach – Web Application 2025

- Developed a web-based AI fitness coach using Python with a local LLM for personalized diet recommendations.
- Integrated external APIs for food analysis and user data processing.
- Strengthened skills in API design, LLM integration, and modern concepts such as MCP servers.

University Projects – Software Engineering & Algorithms 2022–2025

- Built an administrative system in C++ applying Object-Oriented Programming principles.
- Developed projects in C++ and Python focused on data structures and efficient algorithms, including Minimax for AI.

Relevant Coursework

- Fundamentals of Computer and Programming
- Advanced Programming (OOP)
- Data Structures
- Algorithm Design
- Programming Languages and Design
- Systems Analysis and Design
- Operating Systems
- Database
- Software Engineering
- Data Mining
- Artificial Intelligence
- Computer Networks
- Foundations of Secure Computing
- Internet Engineering
- E-Commerce

Soft Skills

- **Big-picture thinker with attention to detail:** Understand overall goals while carefully managing small elements.
- **Creative:** Think outside the box and consider multiple perspectives before deciding.
- **Analytical:** Enjoy breaking problems down, analyzing patterns, and finding the best approach.
- **Deep learner:** Continuously seek to understand concepts thoroughly and improve skills.
- **Persistent:** Keep pushing forward until problems are fully solved or tasks completed.

Languages

English — Advanced (professional working proficiency)
TOEFL iBT scheduled; expected score 110+
